

International Hard Anodizing Association, Inc.

The International Hard Anodizing Association is an organization of companies which are engaged in the production of hard anodized finishes on aluminum components, either for customers or for their own products and of associate members which may be: manufacturers of semi-fabricated aluminum; companies engaged in supplying chemicals and processes or plant and equipment to the hard anodizing industry; or companies which are users of hard anodized components and products but do not have their own anodizing facility.

The aims of the association are: to promote the common interests of its members and the progress and growth of the hard anodizing industry; to engage in the promotion of hard anodizing by the preparation of technical data sheets and other publicity and educational programs; to provide members with technical and general information relating to hard anodizing, new alloys, products and processes, specifications and test methods; and to hold regular meetings of the membership in the furtherance of these aims.

The above aims are accomplished by several means all of which have the common theme of promoting the establishment of relationships and the interchange of information among the members. Many technical matters concerning hard anodizing are addressed at IHAA's biennial conference where papers are presented on various topics and those in attendance are given ample opportunity to interact with one another. One of these means is the encouragement of members to contact one another on problems and situations regarding hard anodizing and to maintain those contacts. Another means is a periodic newsletter which keeps members current on what is going on in the association and with the members. As a part of these newsletters or as a separate mailing members are asked to help one another through a Help Line. Through this service the membership is made aware of a particular problem or question of a member and everyone is encouraged to contact that member directly with any solutions. This has now been enhanced through the internet and the IHAA web site: www.ihanodizing.com. As you can see, IHAA tries to act as a catalyst in bringing together people in the hard anodizing industry to resolve their mutual concerns.

As a part of the hard anodizing community, you are cordially invited to become a part of IHAA so that you may gain from the activities of the association and share in the valuable knowledge available from others in the industry. An application for membership accompanies this information. The information requested in the application will help us evaluate your significance to the hard anodizing industry.

Thank you for your interest in IHAA!

International Hard Anodizing Association, Inc.

Membership Benefits

- ❖ Member companies share in valuable knowledge and networking with over 35 members in the anodizing industry. Members are encouraged to attend the annual Board of Directors meetings and the bi-annual Symposium to interact with fellow IHAA members and continue such contact one-on-one throughout the year. The meetings are held twice a year in Europe or the U.S.
- ❖ Membership in IHAA entitles the company to have a listing on the IHAA website on the “Member List” page.
- ❖ Member companies are entitled to one complimentary registration at the bi-annual symposium. This includes the welcome dinner, lunches and farewell reception. Many technical matters concerning hard anodizing are addressed at IHAA's conference where papers are presented on various topics and those in attendance are given ample opportunity to interact with one another.
- ❖ Non-Members attending the Symposium may apply their registration fee of towards IHAA membership dues of US\$1,200.00 for Firm or Research/University Members and US\$1,400.00 for Associate members if application is made during or after the symposium. Membership dues are paid every two years.
- ❖ Any IHAA member that recruits a new IHAA member is entitled to a 50% discount in membership dues for the current year. If a second new member is recruited, the dues will be discounted another 50%. If a third new member is recruited, no membership discount will be given.
- ❖ Each Firm or Research/University Member shall be entitled to one vote with respect to any matter coming before the membership for action.

Membership Categories

Firm Members (Membership Dues = US\$1,200)

Firms engaged in hard anodizing of aluminum components and products. Membership shall be granted upon application and approval by the Board of Directors to all qualified persons, partnerships, and corporations, and their affiliated operations, engaged in the business of the hard anodizing of aluminum components and products.

Research or University Members (Membership Dues = US\$1,200)

University or Research Centers engaged in the use or develop of hard anodizing. Universities or Research Centers in direct competition with Firm Members will not be eligible for the class of membership. Membership shall be granted upon application and approval by the Board of Directors.

Associate Members (Membership Dues = US\$1,400)

Firms who manufacture or supply plant, equipment and products used in the production of hard anodized components or products. Membership shall be granted upon application and approval by the Board of Directors to all qualified persons, partnerships, and corporations, and their affiliated operations engaged in the manufacture of supply of plant, equipment, and products used in the business of the hard anodizing of aluminum components and products. Associate members are not permitted to vote on IHAA matters.

Emeritus Members (Membership Dues = No Charge)

Individuals who have had distinguish service with the IHAA and are no longer affiliated with a member or associate firm. Membership shall be granted upon the recommendation of a member firm and approved by a two-thirds (2/3) approval vote by the Board of Directors. Emeritus members are not permitted to vote on IHAA matters.

International Hard Anodizing Association, Inc.
Application for Membership

We/I do hereby apply for membership in the International Hard Anodizing Association and, for that purpose, do hereby certify that the following information is true and correct in all respects and that we/I give this information with the full knowledge that the association and/or its Board of Directors may act thereon. In the event that this application is accepted, we/I hereby promise and agree to abide by all the rules, regulations, articles of the association and bylaws and any amendments or additions thereto, and any other rules and regulations of the association with which we are familiar.

FIRM: _____ Year Established: _____
